Markus Baltzer Coaching & Consulting

EuroAI Forum
Leading AI Dialogue

# How are we different?

**1** **AI Implementation Showcase and Toolset**

A platform or event for European businesses to showcase successful AI implementations, fostering knowledge sharing and inspiration.

**2** **Regulatory Sandbox Partnerships**

Collaborative efforts with regulatory bodies to establish "sandbox" environments for safe AI testing within compliant frameworks.

**3** **European AI Talent Pipeline**

Programs designed to connect skilled AI professionals with European businesses, encouraging talent retention and development within the region.

**4** **Sector-Specific Workshops**

Specialized forums or events focusing on AI applications in key sectors of the European economy, such as manufacturing, healthcare, and finance.

# Our Why

1. We recognize the **challenging legal and regulatory landscape** that complicates effective navigation.

2. We identify a **gap in practical case studies** and implementations that go beyond proof of concept.

3. We observe **limited media attention** and support for these critical issues.

4. We acknowledge **limited opportunities for AI development** but see significant potential in adopting tools from American companies.
